EDUCATION

University of Kelaniya
B.Sc(Hon's) in Software Engineering

Colombu, West, Srilanka
Aug 2021 - Feb 2026

TECHNICAL SKILLS

Programming Languages: HTML , CSS , JavaScript , C , Java

Libraries and Tools: React , GitHub

Frame works: next js, express js, Angular js

WORK EXPERIENCE

Intern Software Engineer

December 2024 - June 2025

Techorin, Colombu, Srilanka

- * Assisted in the development of a web-based learning platform, primarily focusing on fullstack development. Designed and implemented key features using modern web technologies, enhancing the user experience and functionality of the platform. Collaborated with the development team to troubleshoot, test, and optimize code for performance and reliability.

Trainee Software Engineer

September 2025 - March 2026

LYXUX, remote

- * Worked on full-stack development and quality assurance. Contributed to 2 real-time projects, implementing both frontend and backend features using Next.js , Express.js, MongoDB. Developed mobile-responsive web applications and ensured high-quality deliverables through rigorous testing and QA processes.

PROJECTS

- **Movie-Application react with moviedb.org api**, Developed a responsive web app using React, Vite, Bootstrap, and the TMDB API. Users can browse recently released movies, search for movies, view detailed ratings and reviews, and watch trailers by clicking on a movie. Implemented dynamic search, interactive UI, and real-time API integration to provide a smooth movie browsing experience. [GitHub](#)
- **School Management System (MERN Stack)**, Developed a full-featured web application using MongoDB, Express, React, and Node.js to manage students, staff, attendance, and user profiles with secure authentication. The system includes application, events, and announcement management, real-time notifications, and alerts. It also supports secure file uploads for images and documents, providing a complete digital solution for school operations. [GitHub](#)
- **MediCare (Final Year Group Project)**, Currently developing a healthcare web application using Angular and OpenAI API. The system allows users to upload prescriptions to identify required medicines and connect with available consultants. It also enables users to input symptoms in natural language and receive AI-based disease suggestions, providing an intelligent and user-friendly healthcare support solution. [private repo](#)
- **Todo App with Google Authentication**, Developed a mobile todo application using React Native and Firebase (Firestore) with Google Authentication for secure user login. The app allows users to add, manage, and store tasks in real-time with a simple and user-friendly interface. [GitHub](#)
- **Mini-Ecommerce-MERN-Stack** ,This mini e-commerce project provides core shopping functionalities for users. It features a product listing page, a detailed product view, and an add-to-cart functionality. Users can view a cart summary showing selected items, quantities, and total costs. The application is designed for a single role (user) and focuses on simplicity and responsiveness. [GitHub](#)

CERTIFICATES

- Getting Started with Compute-AWS educate [Link](#)
- Getting Started with Storage-AWS educate [Link](#)
- Getting Started with Serverless-AWS educate [Link](#)
- Getting Started with Networking-AWS educate [Link](#)
- Getting Started with Security-AWS educate [Link](#)
